PROJECTS

Apna Rasoi – Food Delivery Website Clone

- Developed a food delivery web app using React.js for the frontend and Express.js for the backend. Implemented dynamic UI components for a seamless user experience.
- Built RESTful APIs for efficient data handling and communication.
- Integrated state management and routing for optimized performance.

Portfolio Website

- Built a personal portfolio website using React.js to showcase my work and skills.
- Designed a clean, modern UI with a fully responsive layout for a great user experience on all devices.
- Used React Router to enable smooth navigation between different sections.
- Deployed the site on Netlify, making it easily accessible online.

Real-time Chat App

- Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js). Implemented WebSocket (Socket.io) for instant messaging between users.
- Designed a responsive UI for a seamless user experience across devices.
- Built RESTful APIs for user authentication, message storage, and chat history.
- Integrated JWT authentication for secure user login and data protection.
